More Information

How It Works

The Fine Print

Watch the weight (and the tablet) dissolve

Use it and Lose it

Introducing Mango Trim: the next generation of weight management. Using the power of Tirzepatide, Trim works to increase insulin production and lower glucagon secretion while targeting areas in the brain that regulate appetite and food intake.* All of these revolutionary benefits are packed into a once-daily dissolvable tablet.

- **No Needles Necessary:** Our citrus-flavored dissolvable tablets make painful, inconvenient weekly injections a thing of the past. With Mango Trim, you can watch the pounds melt away as fast as our daily tablets.
- **Feel Better Inside and Out:** Clinical trials show that Tirzepatide facilitates weight loss and significantly improves blood sugar control. This blood sugar maintenance reduces the risk of other obesity-related diseases, such as diabetes.
- **Balanced Blood Sugar, Happy You:** Enhancing the impacts within Trim involves leveraging GIP (glucose-dependent insulinotropic polypeptide), a hormone secreted by the gut in response to food intake. This hormone plays a crucial role in managing blood sugar levels, especially in the context of carbohydrate and fat consumption. GIP facilitates sugar absorption and utilization by signaling the pancreas to release insulin. Additionally, it prevents excessive sugar production by the liver.

**Although Mango Trim can help contribute to weight loss, it's important to complement Tirzepatide with a balanced diet and regular exercise. Schedule a free, 100% online consultation with one of our licensed professionals and start your journey to a healthier you.*

Trim
How do I order Slim?

+

What is Trim by MangoRx?

+

What is the benefit of taking Trim as an Oral Dissolvable Tablet (ODT)?

-

Trim as an ODT is taken once daily (or as directed by your provider) and dissolves in your mouth, entering the blood stream directly through the oral mucosa. As an ODT, this eliminates the potential for dosing errors attributed to certain injectable formats and offers a more convenient, discreet and non-invasive option.

More Information **How It Works** The Fine Print

The Weigh Trim Works

Each component of Mango Trim's revolutionary formula is chosen to create a safe and effective approach to weight management.

- **Tirzepatide:** Tirzepatide works by regulating appetite and food intake. It magnifies the effects of the glucagon-like peptide-1 (GLP-1) and glucose-dependant insulinotropic polypeptide (GIP) receptors, allowing them to extend their activity for days. This allows the body to better regulate appetite and food intake, leading to weight loss and glycemic control. To sum it up: take Trim, feel less hungry, and lose weight more easily.
- **Citrus-Flavored Orally Dissolvable Tablet (ODT):** Our once-daily dissolvable tablets allow for discreet, on-the-go consumption. No weekly shots, no needles, just a citrus-flavored tablet between you and your dream body.

Ready to take the next step? Schedule a free, 100% online consultation with one of our licensed professionals to learn if Mango Trim is right for you.

More Information **How It Works** The Fine Print

Treatment That Fits Your Lifestyle

Thanks to the power of Trim by MangoRx, starting your weight loss journey is as easy as enjoying a daily dissolvable, citrus-flavored tablet, as prescribed by your medical provider. Place the RDT (rapid-dissolving tablet) under your tongue until fully dissolved. Do not swallow. Learn more about potential side effects and important safety information before taking Mango Trim.

Potential Side-Effects:

Although well-tolerated by most patients, Tirzepatide is known to cause side effects like nausea, upset stomach, diarrhea, and decreased appetite, especially toward the start of treatment. However, more serious reactions, such as decreased appetite, constipation, indigestion, and other gastrointestinal discomfort, can occur. Patients using other diabetes medications should watch for signs of hypoglycemia, such as shakiness, sweating, dizziness, headache, confusion, and weakness. While rare, serious side effects like kidney and gallbladder problems, pancreatitis, thyroid tumors, and allergic reactions can occur. Speak to your medical provider if you experience any of these symptoms.

Important Safety Information:

Like any other medication, consult a healthcare provider to ensure Mango Trim is right for you. MangoRx gives you access to personalized care with real, licensed medical professionals to ensure you're getting the perfect treatment. Schedule your free, 100% online consultation and start your journey to a better body today.
